WAR
FRC Team 7183

STUDENT NEWSLETTER - JANUARY

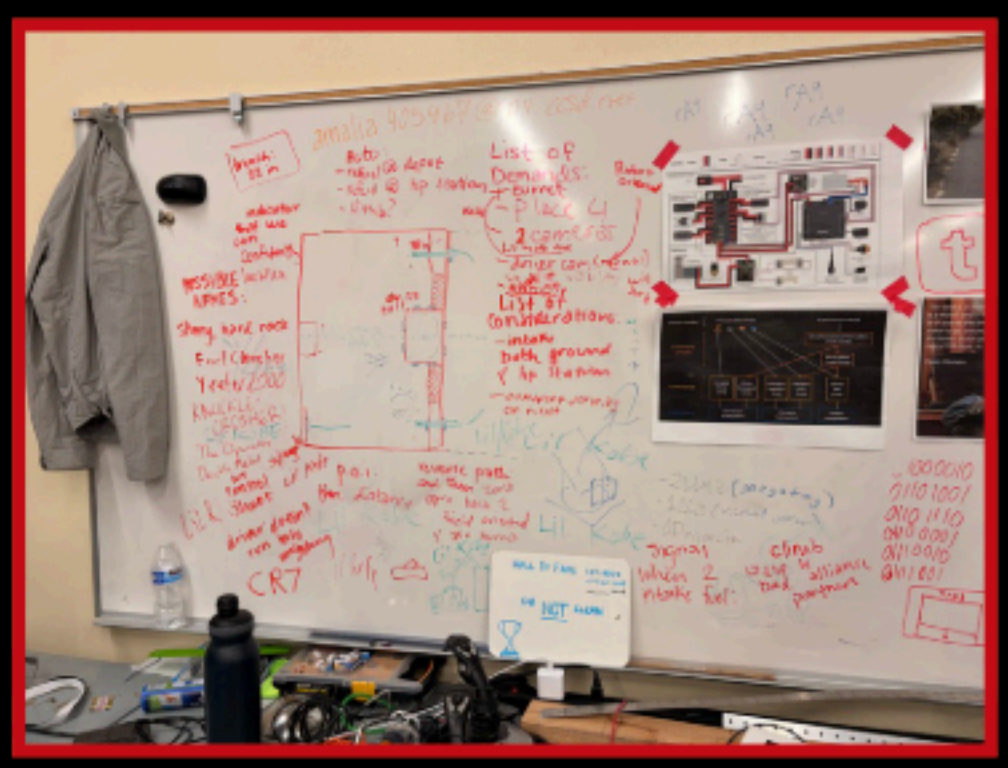

WAR Team embarked on even bigger journeys as they leaped into January, marking the start of build season. Along with some preseason team building, our team has really learnt what it means to rely on each other during our design process.

So far the season has presented many opportunities to practice communication between our various committees as we've been iterating, prototyping, and developing many ideas; courtesy to our design team.

A big thank you goes to WinCo Foods, our sponsor for the month once again. Their continued generosity and support has been a major help toward funding both our upcoming VEX Competition, and our robot that will be competing in this year's FRC REBUILT competition.
